SANIYABANU ANSARI

Software Engineer | Full-Stack Developer

Toronto, ON | 437-727-6407 | ansarisaniyabanu2@gmail.com | linkedin.com/in/saniiya-ansari | github.com/Saniya513

SUMMARY

Software Engineering Technician graduate (With Honours) with hands-on experience building full-stack applications, backend APIs, and third-party integrations. At Guelph Solar, built the frontend, backend APIs, and integrations for an AI-powered sales assistant in a 2-person team. Skilled in React, Next.js, TypeScript, Node.js, C#/.NET, PostgreSQL, and MongoDB, with a strong foundation in testing, database design, AI integration, and Agile.

TECHNICAL SKILLS

- **Languages:** Java, C#, Python, JavaScript, TypeScript, SQL, PL/SQL
- **Frontend:** React, Next.js, HTML5, CSS3, Vite, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, .NET, Entity Framework Core
- **Databases:** MongoDB, MongoDB Atlas, Mongoose, PostgreSQL, Oracle SQL, Database Design, Normalization
- **AI Integration:** LLM APIs, RAG, Text Embeddings, Semantic Search
- **Testing:** Unit Testing, Python unittest, API Testing, Postman, Manual Testing, Debugging
- **Tools & Practices:** Git, GitHub, VS Code, Visual Studio, Oracle SQL Developer, Make.com, Agile, SDLC, OOP, UML, Software Design, Requirements Analysis

EXPERIENCE

Guelph Solar — Artificial Intelligence Engineer | Live site — Jul 2026 – Sep 2026

- Co-developed an AI-powered sales assistant in a 2-person team, across frontend, backend, database, and integrations.
- Developed core frontend components using Next.js, React, and TypeScript and connected them to backend APIs.
- Built and integrated backend APIs with Node.js, Express.js, and PostgreSQL for customer and conversation management.
- Built Make.com automation workflows integrating the application with HubSpot, Google Meet, and Dropbox.
- Tested the web application and troubleshot integration issues to verify features worked end to end.

Centennial College — Mathematics Peer Tutor — Jan 2026 – Aug 2026

- Provided one-on-one math support, explaining concepts and guiding students through problem-solving.

Walmart — Overnight Associate — Jul 2025 – Present

- Stock, sort, and organize merchandise while maintaining accuracy and productivity in an overnight retail environment.

PROJECTS

Raspberry Pi Drone Environmental Monitoring & Flight Safety System | Python, Automated Testing | GitHub

- Developed a Python environmental monitoring and flight-safety simulation using simulated temperature and humidity data.
- Implemented safety classification and a flight-safety gate that blocks simulated takeoff in unsafe humidity.
- Designed a drone state machine (DISARMED, ARMED, TAKEOFF, LAND) with validated state transitions.
- Built 31 automated tests with 0 failures, covering deterministic simulations and hardware-fallback behavior.

CampusRent — Student Rental Platform | React, TypeScript, Node.js, MongoDB | GitHub

- Contributed to frontend, backend, and database features of a rental platform for verified students in an Agile team.
- Added availability control to the listing-editing workflow so students can manage item availability.
- Platform features include student verification, search, rental requests, messaging, reviews, and admin moderation.

JobPilot — AI Job Search Assistant *(In Progress)* | C#, ASP.NET Core, Entity Framework Core, SQLite

- Building a REST API to track job applications using ASP.NET Core, Entity Framework Core, and SQLite.

OrderSync — Online Shopping Management System | Oracle SQL, Relational Database Design, Normalization

- Designed a relational Oracle SQL database to manage clients, products, orders, and inventory.
- Normalized the schema to reduce redundancy and maintain data integrity across related tables.
- Wrote SQL operations supporting e-commerce workflows, including order and inventory management.

EDUCATION

Centennial College | Ontario College Diploma, Software Engineering Technician (Honours) | GPA: 3.944/4.5 — Aug 2026

CERTIFICATIONS

- Foundational C# with Microsoft — freeCodeCamp & Microsoft *(In Progress, expected Nov 2026)*
- Microsoft Applied Skills: Develop a Generative AI Chat App Using the Microsoft Foundry SDK *(In Progress)*
